

The best way to get a jump on next

years work is to start this harvest with a **Crary CYCLONE** Chaff Spreader. Ideal for minimum and no-till farming, **CYCLONE'S** hydraulic spinners maximize distribution,

The Advantages Are Spread In Your Favor

CYCLONE comes completely equipped with a whirlwind of standard features including swing away for easy sieve access, adjustable front and rear shields, quick installation and heavy gauge construction. This harvest, put the power of a **Crary CYCLONE** behind you.

eliminating uneven soil drying and staggered wet strips. **CYCLONE** also reduces interference with chemicals caused by wet and heavy windrows.

Single and Tilting Double Disc **CYCLONES** are available for all major combine models.

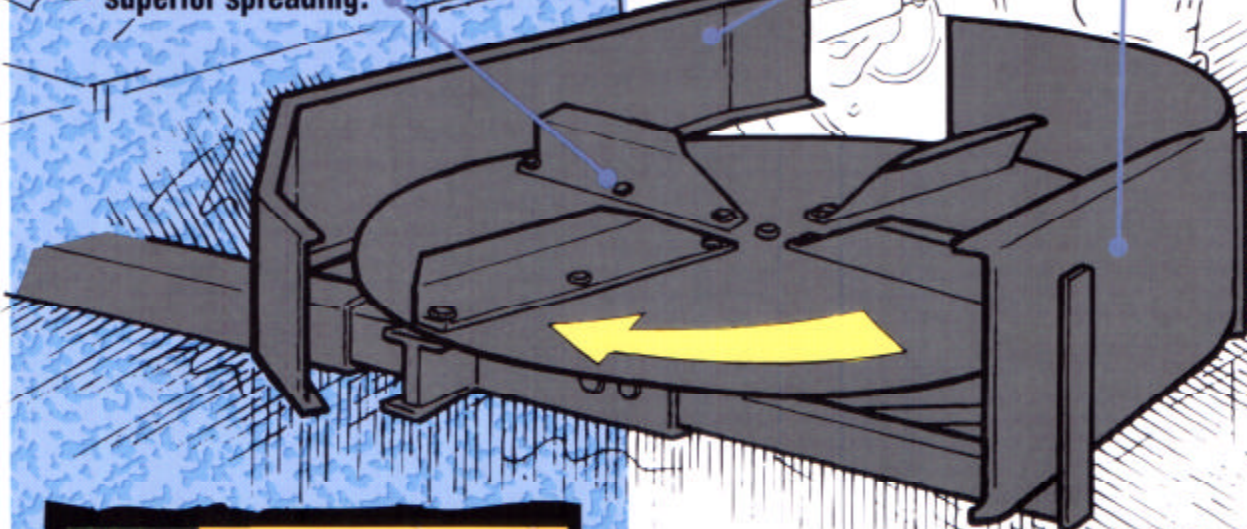

Better Harvests Start With Better Concepts.

Features

Each spinner disc has 4 angled paddles for superior spreading.

Vertically adjustable front and rear shields and horizontally adjustable spinner and shields.

Exclusive Tilting Feature

CYCLONES come complete with hydraulic motor, hoses, fittings, flow valve and flow pans (where needed).

Flow valves have internal pressure relief to protect hydraulic circuits.

Perfect for larger combines and wider headers, Tilting Double Disc units allow spinners to adjust from 0 to 10 degrees for more accurate chaff distribution and combine tire clearance.

Single spreader comes with a 36" spinner and axle mount. Tilting Double spreader comes with two 24" spinners and axle mount. Approximate weight of each unit is 300 lbs.
